Empower The Youth Through Education

Establish School Outreach: Partner with our schools to teach students about public service and civic engagement.

Host Workshops: Organise interactive sessions, discussing our values as Young Liberals to inspire the future generation and to help inform them.

Young Voters: Educate young voters about their rights and responsibilities, and encourage them to participate in local elections and decision-making processes.

Support For Mental Health In Schools

Work to help implement mental health education programmes in schools, ensuring students have access to resources and support from an early age, and this support remains available as they get older.

Advocate for training all staff to recognise and support students' mental health needs effectively.

Ensure there are robust processes in place for all staff to get help should they need it.

Increase Activity And Participation

Social Media: Develop a dynamic social media strategy to amplify the voices of Young Liberals, facilitating platforms for discussion, collaboration and activism.

Participation: Encourage greater participation in campaigns, events, and forums to engage people in political discourse, making it easier for them to advocate for causes they care about.

Organise regular interactive Q&A sessions online, with people from different areas of the party, to address concerns and ideas from young members, creating a sense of community and involvement.
