More accessible policy. I will fight for:

- Better communications around the policy process at YL Conferences, both to make it more transparent and to encourage a larger number of more diverse people to submit policy. We have been trending in the right direction on this but more needs to be done.
- Better inclusion of branches in the policy process. They are a vital cog in the YL machine, and can help us capture new policy wonks for the organisation.
- A better approach to Constitutional Amendments. Feedback from Cambridge made it clear many members feel the process can be exclusionary. I want to see clearer formats for proposed amendments.

Engagement, regionally

- Regional Chairs need to have better support. As a former two-term RC I hope I can offer this.
- I also want to implement a tracker for Regional Chairs' manifesto commitments
- Continue our presence at Regional Conferences.
