

Harvey for Federal Council – Plain text manifesto

About me:

This year I was YL's representative to the Federal Board and Federal People Development Committee.

I've seen decision making and our strengths at the very heart of the party, but also where the Party needs to go further - on strategy and diversity.

That's what I will push as your voice on Federal Council.

Your voice in the Party

With a new President, Federal Board and Committees about to be elected, this is a crucial time for Federal Council.

We need strong advocates for young people at the heart of the Party to ensure that the best decisions are being made - to take the fight to Labour and Reform and help us grow.

Here's my plan for Federal Council

1. Pushing for bold decision-making to help the Party share its message and reach more liberals.
2. Making sure the Board is pulling its weight in terms of diversity and inclusion - including putting young voices at the heart of decision-making.
3. Building effective working relationships with with other FC members to build support for young people.
4. Reporting back to the Exec and membership, so you know what I and the other reps are doing on your behalf.
