

My Vision for Policy

**Policy that has
an impact**

YL is a major policy force within a party, for which all involved deserve massive thanks. I want to continue this, with policy that reaches the highest levels of the party

**Policy that is
acesible**

Constitutional amendments occupy much of valuable conference time, but are also exclusive. I want to limit the number of CAs at Conference, and also increase the accessibility of the constitution, making it easier to understand

**Policy that is
serious, yet
can be radical**

Policy should be detailed, easy to understand, and comprehensive. Policy is not just a tool to start a discussion, it is a way to push YL forward. This would not restrict sincere radical policy however

**And Remember:
Cast Your Vote for Cian**
